

Vallabh Govt. College Mandi (H.P.)

Feedback Analysis and Action Taken Report – Session 2022-23

A feedback survey to assess the viewpoint of the students on the curriculum, teaching learning processes and infrastructure has been conducted during the month of march 2023. Opinion of about 1172 students of the college was collected using google form based structured feedback. There were 12 closed and open-ended questions in the feedback questionnaire. The feedback reflects that most of the students were satisfied with the syllabus covered and the teaching style of the teachers. About 80% students also found teachers fair in internal evaluation process of mid-term examination. The teaching, mentoring process, academics and library facilitates, social and emotional growth was shown satisfactory. Most of the students were fully satisfied with the teachers' identification of student's strengths and weaknesses to encourage them with providing right level of challenges. However, most the students and teachers raised the issue regarding shortage of the classrooms and large class size. In this context, the new college building is under construction and very soon this issue will be resolved. The students' feedback also shows that they also agreed that the institution makes effort to engage them in the monitoring, review and continuous quality improvement of the teaching learning process. Some students demanded out campus visits for better understanding of the practical aspects of the subject, therefore, in last term most of the U.G. and P.G. departments took their students on trip to various places. In addition, feedback has also collected from college staff and alumni to improve the working of the institution in overall aspects. When the stakeholders were asked for suggestions, the main suggestions and action taken by the institution so far are summarised as followings:

Suggestion by Students	Action taken
Use smart classes because sometimes we are not able to understand things orally ICT tools should be used at least once in a week as it improves students' knowledge retention By increased use of smart classes introduce technology in the classroom.	Additional 06 Smart classroom are created and proposal is to convert all the classrooms into smart rooms within next 05 years.
In my opinion regular test once a week of the covered syllabus may help the students to prepare well and also help them covering the chapters	Teachers are advised to conduct class test on regular intervals
Conduct debates, seminars and talks for the students. Study should be not for marks but for knowledge	All the departments are advised to organise seminar, talks and other subject related activities
Performance of mid-term exams and assignments should be discussed in the class so that students get to know their weak points and work on them for further exams	The suggestion will be implemented in coming house examinations.
Teachers should have to identify our weaknesses and help to overcome them and also motivated us for our future and study related	Mentor-mentee program is being introduced

More class rooms and labs are needed as per student strength.	New building is under construction to overcome the shortage of classrooms
Suggestion by Staff	Action Taken
There must be exclusive funding for field tours and excursions. Department wise amenities must be provided on priorities.	Various educational tours and field visits are being organized by U.G. and P.G. departments, for which students and Teachers are paid TA/DA according to Govt. norms.
Infrastructure should be upgraded and faculty rooms should be provided to each department. Improvement in Infrastructure according to students' strength.	In this context, the new college building is under construction and very soon this issue will be resolved.
Kindly provide facility to teachers to enhance their ability and carrier by organizing FDP, Workshops and Seminars. Also provide special leaves for PhD.	Different departments of the college are organizing Workshops, seminars as well as conferences occasionally. Department of higher education is already providing two years study leave for Ph.D.
The college canteen may be upgraded to a neat and clean sitting place and also the canteen menu may have wide variety of food/beverage items.	The menu of College Canteen has been upgraded and it has started providing lunch for teachers.
All classrooms should be made smart classrooms with interactive panels, audiovisual facilities, sound systems etc. The smart panels installed in few classrooms which are locked should be made available for the classes as per the timetable. To provide proper audio-visual facilities including: Live streaming of class room teaching, A Public address system, Display Board and ergonomically designed age-appropriate furniture.	Additional 06 Smart classroom are created with interactive panels as well as audiovisual facilities and proposal is to convert all the classrooms into smart rooms within next 05 years.
Suggestion by Parents	Action Taken
Amendment of fee structure of professional courses can be done.	Fee structure is decided by the universities and implemented in the college as such.
Use smart technologies to modify teaching skills.	Additional 06 Smart classroom are created with interactive panels as well as audiovisual facilities and proposal is to convert all the classrooms into smart rooms within next 05 years.
There are self-financed courses in college, which are unaffordable to poor parents. So my suggestion is to increase the seats of vocational courses like BBA BED, PGDCA	10% of seats are reserved for EWS in higher education all over the India and this is implemented in this college also.

etc. And provide these courses under the subsidised seats, so poor parents can afford these courses.	
There is no regularity and unusual events happening many times there is no interaction between students and teacher	Various events are organized by different departments for all round development of students. For improved interaction between students and teacher Mentor-mentee program is being introduced.
Manage the rooms for classes with a normalise strength and inform students about each thing through class WhatsApp groups.	New building is under construction to overcome the shortage of classrooms. Whatsapp groups has been created for every class and students are informed about every event through these groups.
